

CURRICULUM VITAE

EVANCE CHRISOSTOM

IT Professional | Web & Software Developer | Networking Enthusiast | Digital Technology Entrepreneur

Location: Tanzania

Phone: [0611542524]

Email: [evancechrisostom05@gmail.com]

PROFESSIONAL PROFILE

A passionate and technology-driven IT professional with practical interests and experience across **web development, software development, computer networking, computer maintenance and troubleshooting, cybersecurity, graphic design, digital marketing, and technology entrepreneurship.**

Experienced in developing and planning technology solutions using modern web technologies and programming languages, while also having practical knowledge of computer hardware, operating systems, networking equipment, servers, databases, and local network configuration.

Strong interest in building real-world digital solutions that solve everyday problems. Has worked on several technology concepts including **room allocation systems, citizen service portals, gaming/esports platforms, laboratory information management systems, tourism websites, e-commerce and food delivery systems, church management systems, and internet/Wi-Fi service solutions.**

Also interested in entrepreneurship and digital business, including online services, digital products, property/room brokerage, internet distribution, and technology services.

CORE TECHNICAL SKILLS

Web Development

- HTML5
- CSS3
- JavaScript
- Tailwind CSS
- Bootstrap

- Responsive Web Design
- Front-end development
- Back-end development
- REST API development
- Node.js
- Express.js
- PHP
- NPM
- Local web server configuration

Software Development

- C Programming
- JavaScript/Node.js
- PHP
- Application architecture
- MVC architecture
- Database-driven applications
- System analysis and design
- API integration
- Authentication and authorization concepts

Databases

- MySQL
- MariaDB
- MySQL Workbench
- Database design
- CRUD operations
- Relational database concepts
- Database management

Networking

- Computer networking
- TCP/IP
- OSI Model
- IP addressing
- Subnetting
- VLSM
- DNS
- Network configuration
- MikroTik networking
- Wireless networking
- Router configuration
- Switches

- Internet distribution
- Captive portal concepts
- Wi-Fi hotspot systems
- Cisco Packet Tracer

Computer Maintenance & Troubleshooting

- Computer assembly and disassembly
- Hardware troubleshooting
- Operating system installation
- Windows troubleshooting
- Linux installation and configuration
- Kali Linux
- BIOS/UEFI configuration
- Secure Boot configuration
- Storage troubleshooting
- HDD and SSD management
- SATA and PCIe storage
- Driver and software troubleshooting
- System diagnostics
- Printer configuration
- Wireless printer setup

Cybersecurity

- Basic cybersecurity concepts
- Kali Linux
- Security tools and environments
- Malware/security warning investigation
- File integrity verification using SHA-256
- Secure system configuration
- Network security concepts
- Interest in ethical hacking and penetration testing

Tools & Technologies

- Visual Studio Code
- Git
- GitHub
- XAMPP
- MySQL Workbench
- NPM
- Node.js
- Cisco Packet Tracer
- MikroTik
- Linux

- Windows
 - OBS Studio
 - Docker concepts
 - AI-assisted development tools
-

TECHNICAL PROJECTS

Room Allocation System

Designed and developed the concept of a web-based **Room Allocation System** for managing hostel accommodation.

Key areas include:

- Room management
- Student/client allocation
- Database management
- Administrative management
- Web-based interface
- Record management

Technologies: HTML, CSS, JavaScript, PHP/Node.js, MySQL and modern UI frameworks.

GameHub Arena / Nexus Arena

Developed the concept of an esports and gaming platform designed to provide gaming-related services and digital interaction.

Planned features include:

- User accounts
- Gaming platform
- Admin dashboard
- Payment integration
- Mobile money support
- Tournament/esports features
- Notifications
- PDF generation
- Secure authentication

Technologies: PHP MVC, Bootstrap 5, MySQL 8+ and payment gateway integrations.

Sensa Tanzania Citizen Portal

Worked on the concept of a modern citizen-oriented web portal designed to provide digital services through a centralized interface.

Technologies/Areas:

Tailwind CSS, web development, UI/UX, database systems and digital service design.

Mwaukoli Health Laboratory Information Management System (MHLIMS)

Designed the concept of a Laboratory Information Management System intended to improve management of laboratory operations.

Planned capabilities include:

- Client management
- Laboratory test recording
- Diagnosis records
- Prescription management
- Printable patient reports
- Laboratory equipment tracking
- Administrative management

Proposed technologies: React, TypeScript, Express.js and MySQL.

Internet/Wi-Fi Distribution System

Explored the design of an internet distribution business using **TTCL fiber, MikroTik routers and wireless access points.**

Areas explored include:

- Internet distribution
- Wi-Fi hotspot deployment
- Captive portals
- User authentication
- Voucher systems
- Mobile money payments
- Network coverage planning
- MikroTik configuration

Local Network Website Sharing

Worked with local web servers and explored methods of making locally hosted websites accessible to other devices through an IP address on a local network.

Experience includes working with:

- NPM-based development servers
- Localhost
- IP addressing
- LAN connectivity
- Web server accessibility

Other Digital Projects & Concepts

Additional technology projects and concepts explored include:

- Food delivery systems
- E-commerce websites
- Tourism websites
- Church management systems
- Movie/content platforms
- Digital business platforms
- Property and room listing platforms
- Online service platforms

COMPUTER HARDWARE EXPERIENCE

Practical interest and experience in computer hardware and maintenance, including:

- Identifying computer components
- RAM installation and upgrades
- HDD and SSD installation
- SATA storage
- PCIe storage
- External storage adapters
- Computer ports and expansion
- BIOS/UEFI configuration
- Bootable USB creation
- Operating system installation

- Hardware compatibility
 - Basic computer diagnostics
 - Printer connectivity and configuration
-

OPERATING SYSTEMS

- Microsoft Windows
 - Linux
 - Kali Linux
 - Basic Linux system administration
 - Windows troubleshooting
 - Boot and partition management
 - UEFI/GPT configuration
-

NETWORKING & INFRASTRUCTURE

Knowledge and practical interest in:

- Routers
 - Switches
 - MikroTik RouterBOARD
 - Wireless Access Points
 - Ethernet cabling
 - Network addressing
 - Internet connectivity
 - LAN configuration
 - Wi-Fi coverage planning
 - Network troubleshooting
 - Cisco networking simulation
-

GRAPHIC DESIGN & DIGITAL MEDIA

Experience and interest in:

- Graphic design
- Digital artwork
- Social media graphics
- Cover artwork
- Promotional designs

- Website UI design
 - Branding concepts
 - Digital content creation
 - AI-assisted creative production
 - Video creation concepts
-

DIGITAL MARKETING & ONLINE BUSINESS

Strong entrepreneurial interest in using technology to create and market digital services.

Areas of interest include:

- Digital marketing
 - Social media marketing
 - Online businesses
 - Digital products
 - Website-based businesses
 - Property/room brokerage
 - Internet service businesses
 - Online advertising
 - Business branding
 - WhatsApp business communities
-

ENTREPRENEURIAL PROJECT

Dev Craft Technology Company

Developed the concept of a technology company focused on providing digital solutions to individuals and businesses.

Services include:

- Web Design
- Web Development
- Software Development
- App Development
- UI/UX Design
- Digital Marketing
- Technology Training
- Cybersecurity-related services
- System Maintenance

Technologies explored:

Node.js, Express.js, MySQL, Tailwind CSS and modern web technologies.

PROGRAMMING EXPERIENCE

C Programming

Experience with programming fundamentals and development of menu-based/programming projects.

JavaScript

Experience with:

- Front-end scripting
- NPM
- Node.js
- Web applications
- Server-side development

PHP

Experience with:

- Dynamic websites
- Database-driven applications
- MVC concepts
- Local server environments

TECHNICAL KNOWLEDGE

- Software installation and configuration
- Database systems
- Web servers
- Local development environments
- Version control
- Git/GitHub
- API concepts
- Payment gateway concepts
- Authentication systems
- Network infrastructure

- Cybersecurity fundamentals
 - Cloud/VPS concepts
 - Docker fundamentals
 - AI tools for development and content creation
-

PERSONAL STRENGTHS

- Problem solving
 - Technology research
 - Creative thinking
 - Self-learning
 - Troubleshooting
 - System analysis
 - Entrepreneurship
 - Adaptability
 - Willingness to learn new technologies
 - Interest in real-world technology solutions
 - Ability to combine technical and creative skills
-

AREAS OF PROFESSIONAL INTEREST

- Software Engineering
 - Web Development
 - Full-Stack Development
 - Network Administration
 - Cybersecurity
 - IT Support
 - System Administration
 - Database Administration
 - Cloud Computing
 - Digital Entrepreneurship
 - UI/UX Design
 - Digital Marketing
 - Technology Consulting
-

LANGUAGES

Kiswahili: Fluent

English: Working proficiency
